In this report along with above-mentioned data following data is added.

- Work region
  - Market in which agency is present / associated
- Agency Name
  - Name of agency, whose stock is uploaded by GAVL employee.
- Visit date
  - It is the date on which agency stock is uploaded to the server

## Mobile UI

### Steps

- Open the app and click on the **STOCK UPDATE** Tab on dashboard
- On clicking **DISTRIBUTOR STOCK UPDATE** UI will open
  - Search functionality to search previous activity performed on the agency
  - It contains the list of stock update activities performed by the user.
  - Click on + button to perform new activity
  - On clicking + button Add **DISTRIBUTOR STOCK UI** will open
  - Add **DISTRIBUTOR STOCK UI** contains
    - Select the distributor from the drop-down list
    - Select Product from the drop-down list
    - As soon as product is selected, opening quantity of the distributor will be displayed
    - On Click at **Opening Qty** details regarding the previous visit will be displayed
    - Now enter the desired quantity and click on **ADD** button
    - Selected product and its quantity will be added to container.
    - Perform same step for addition of multiple product and its stock.
    - After that click on **SUBMIT** button.
    - On **SUBMIT** button click data will be uploaded on server and app UI will be back to list view UI
